DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species VI in Paper No. 7 is acknowledged.
2. Claims 14-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

Drawings

3. The corrected or substitute drawings were received on 3/20/02. These drawings are acceptable.
4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference signs not mentioned in the description: 32 and 34. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference signs in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 6-11, 21, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Catt.

In accordance with MPEP 2111, Catt discloses a holder (Figure 4) structurally meeting the limitations of the claims and capable of supporting a stringed bow comprising:

- A support member (50, 54);
- A spacing member (40, 46) combined with the support member and extending inwardly and upwardly therefrom;
- An engagement member (20, 48) combined with the spacing member;
- The support member comprises a wall (50, 54) to the same degree claimed;
- The support member wall has an opening formed therein capable of accommodating an arrow;
- The support member comprises two or more support arms (54);
- The spacing member comprises a wall or arm having an inward section and an outward section (Figure 4);
- The spacing member is adjustable, to the same degree claimed; and
- The engagement member further comprises a strap (14, 16, 18).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Catt.

Catt discloses the claimed invention except for the engagement member comprising a wall having at least two openings. It would have been an obvious matter of design choice to

Art Unit: 3727

have two openings instead of the one formed in the support member, since applicant has not disclosed that two opening formed in the support member solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with the one opening.

Allowable Subject Matter

9. Claims 2-5 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Burton, Radocy, Sanchez, Jr., and McKinnon are cited for holders capable of holding a stringed bow.
